

# Letter of Recommendation

April 09, 2021

To Whom It May Concern,

It is my pleasure to, in this letter, recommend Nikhil Bhasin for the Software Development Engineer position.

Nikhil Bhasin joined Internet Bull Report as a Software Development intern from Feb 1, 2022, to May 1, 2022. His responsibilities included developing scalable, fast, robust, and rich web-based solutions to solve complex business problems using the latest Front- and Back-end technologies.

During the course of his internship, Nikhil proved himself to be dependable and a hard working with solid problem solving and technical skills. I was impressed by Nikhil's ability to complete the challenging tasks assigned to him. For all his deliverables, Nikhil not only met all the deadlines but had run multiple checks on his programs before making them public, ensuring there were little to no errors when the code was deployed.

Nikhil was very serious about his work and regularly enrolled in courses and classes to stay in tune with the newest developments in programming which helped him upgrade skills and come up with novel solutions. Nikhil's ability to explain his programs and code in a way that non-experts easily understood, enabled him quickly to get buy-ins from cross-functional teammates. He frequently pitched new ideas and solutions at project meetings and was great at listening to others and internalising constructive feedback.

Overall, Nikhil is a talented and hard-working team-player. I have no reservations about strongly recommending him for the Software Development Engineer position. I have no doubt that he could excel in the position given the right guidance.

Please feel free to contact me if you have any questions.

Yours truly,

**Luka Marjanovic**
